DETAILED ACTION

Election/Restrictions

1. Newly submitted claims 1-8 and 10-15 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

The claims now seem to be directed to an invention that is performed without the use of any type of computer or processing device (since the amendment now defines the sample cards as, "physical paint color sample cards") which was not the case in view of the originally filed claims.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 1-8 and 10-15 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Response to Arguments

2. Applicant's arguments filed 11/17/06 have been fully considered but they are not persuasive.

In reference to claims 1-8 and 10-15, Applicant traverses the previously made election/restriction requirement based upon the original presentation of the claims (see pages 2-7 of Applicant's Remarks). Applicant goes on to explain that the claims, as originally filed, did not recite the use of displaying the paint sample cards using a computer or computer display and cites passages of the specification which describe the type of display as referred to by the claims

Art Unit: 2628

(see pages 3-5 of Applicant's Remarks). Applicant further argues that the amendment placing the word "physical" into the current claim language, to provide, "physical paint sample cards" on a "physical display," was performed in response to the previous Office Action where the Office stated that the previously argued limitation of "physical paint sample cards" was not recited in the claims (see pages 5-6 of Applicant's Remarks) and therefore was not considered.

The Office firstly points out that the original claims recited, "A method for displaying color samples...placing the selected paint colors on a first plurality of sample cards ..." (see, for example, claim 1 filed 07/15/04). The amendment filed 08/11/06 has modified claim 1, and all other independent claims similarly, to recite, "A method of displaying paint color samples in a two-dimensional physical display unit...placing the selected plurality of paint colors on a first plurality of physical paint color sample cards..." It is clear that as originally filed, the claims could be interpreted as being displayed on a computer display, using a computer program such as the program cited as prior art, Microsoft PhotoDraw, since the sample cards of the claims could be interpreted as color swatches programmed in Microsoft PhotoDraw. However, with the newly amended claim language, it is clear that the scope of the claims has changed, since these sample cards are now "physical" cards and not some type of element displayed by software. Therefore, since the scope of the claims have changed from their original presentation, the Office maintains the previous election/restriction requirement, making the requirement **FINAL**.
